Simla, the 31st August 1940.

No. 1 (1)-E.T./40.—In exercise of the powers conferred by rule 101 of the Defence of India Rules, the Central Government is pleased to direct that the notification of the Government of India in the Department of Commerce, No. 1 (1)-E.T./40, dated the 17th February 1940, relating to the supervision of the business of the firm known as Paper Company Van Reekum (Bombay), Limited, Bombay, shall be cancelled.

Simla, the 31st August 1940.

No. 17 (26)-E.T./40.—With reference to the notification of the Government of India in the Department of Commerce, No. 17 (26)-E.T./40, dated the 19th June 1940, the following Order of His Majesty in Council is published for general information:—

AT THE COURT AT BUCKINGHAM PALACE, THE
11TH DAY OF JUNE, 1940.

Present,

The King's Most Excellent Majesty in Council.

Whereas, by reason of a declaration of war against His Majesty by Italy, His Majesty has been compelled to proclaim the existence of a state of war with Italy:

And whereas by an Order in Council dated the 27th day of November, 1939, His Majesty was pleased to direct certain measures to be taken against the commerce of Germany as an act of retaliation against the violations of the laws and customs of war, the rights of neutrals and the obligations of humanity committed by the German Government and recited in the said Order:

And, whereas these violations have continued and are evidently part of the settled method of waging war which Germany has adopted:

And whereas Italy by her actions has associated herself with Germany in the present war and has thereby made herself a party to the method of waging war adopted by Germany and will share in any advantages derived therefrom:

And whereas the commerce of Italy will, equally with that of Germany, be employed to further the common cause of the enemies of His Majesty:

And whereas these facts give to His Majesty an unquestionable right to apply to the commerce of Italy measures similar to those taken against that of Germany:

Now, therefore, His Majesty is pleased, by and with the advice of His Privy Council, to order, and it is hereby ordered, as follows:—

Subject to the substitution of the 4th day of June, 1940, for the 4th day of December, 1939, in Articles 1 and 2 thereof, the Order in Council dated the 27th day of November, 1939, shall apply for restricting the commerce of Italy in the same manner as it applies for restricting the commerce of Germany.

PRESS COMMUNIQUE.

Simla, the 2nd September 1940.

The assets of Chemdyes, Limited, were vested under the orders of Government in the Custodian of Enemy Property on the 29th May 1940.

The Custodian has now with the approval of the Government of India entered into an agreement with Imperial Chemical Industries (India), Limited, for the sale to them of the assets and liabilities of Chemdyes.

Tenders were invited for the purchase of the assets and liabilities of Chemdyes by a notice published in various newspapers on 22nd July 1940. A tender was received from Imperial Chemical Industries but from no one else. This tender was below the reserved price fixed by Government and was therefore rejected, and this rejection

of tender was duly published in the Bombay papers. The Central Government then considered the matter further and as they were satisfied that it was in the interests of consumers of dyestuffs in India that the assets of Chemdyes should be disposed of to a firm well versed in the importation and distribution of dyestuffs and also that this was the most effective method of performing their obligation of preserving the property, they decided to negotiate by private treaty with the only tenderer.

Negotiations were held at Simla and it was found that the main reason why the tender had failed to reach the reserved price was that the tenderer placed no value on the cargoes belonging to Chemdyes in enemy ships in enemy ports which from the point of view of the Custodian has considerable post-war value. It was therefore decided to omit these cargoes from the sale. Imperial Chemical Industries also increased their original offer, and Government were satisfied that a fair price had been arrived at and therefore authorised the Custodian to agree to sell.

The terms of agreement give Government power to regulate sale prices, to continue the rationing scheme already in force for disposal of dyes and also to ensure the supply of adequate quantities of dyes to those Provincial Governments who have decided to keep stocks for supply to the handloom industry.

Annual Report of the Royal Botanic Garden and the Gardens in Calcutta and of the Lloyd Botanic Garden, Darjeeling, for 1939-40.

ROYAL BOTANIC GARDEN.

General.—The Garden records indicate growing interest in horticulture among the general public. Year after year there is an increasing demand for the supply of economic, medicinal, garden and roadside plants. Opportunities are taken by a large section of the public

of utilising the services of the scientific officers and horticulturists of this department in the solution of many a problem of taxonomy, arboriculture, gardening, plant breeding and crossing experiments. During the course of a few years marked improvements have been made in hybridisation and propagation of plants. Much light has also lately been thrown on plant genetics, plant physiology, plant pathology, algology and ecology by recent investigators. The present method of circulating the results of experiments through scientific journals enables workers in different parts of the world to keep themselves in touch with the progress of science and to undertake studies of plants in newer aspects under conditions suitable to their respective countries. The Royal Botanic Garden, Calcutta, has been taking its full share in the advance made in the various directions of botanical and horticultural activities. The garden thus continues to be the centre for disseminating authentic information on Indian flora and gardening in India and abroad and contributes considerably to the widespread development of horticulture and to the promotion of our knowledge of the vast vegetation of India. It is gratifying that ordinary cultivators are also becoming conscious of the possibilities of horticulture. It is hoped that at no distant date, with the progress in education in the villages, our agriculturists will not hesitate to adopt the latest scientific methods of growing economic plants and marketable flowers.

Failure or success in raising annuals, particularly during the cold season, depends much on the weather conditions. Prolonged rains during the year made many experts rather sceptical about the prospect of this year's season flowers. In spite of this drawback there has been an all-round good result in the production of flowers. In this garden the standard and the quality of the flowers reached a very high order. The exhibits that were shown this year in the garden and in the flower shows of the Royal Agricultural and Horticultural Society of India well merited the appreciation of competent authorities, and the judges were unanimously of opinion that the ornamental plants and the flowers exhibited by this garden were the best this year. The garden, therefore, rightly deserved to be the recipient of the first prizes in almost all the sections at the annual shows. Dahlias, Asters, Sweet peas, Salvias, Phlox, Pansy, Gerberas, Hollyhocks, Cornflowers, Verbinas, Heliotropes and others were of record size and excellent quality. Their magnificent colour and the luxuriance of the blooms won the admiration of all. The judicious display of flowers this year too in advantageous spots and along the edges of the lakes enhanced enormously the beauty of the garden in the cold weather. The garden thus attracted an unprecedented number of visitors this year. Numerous picnic parties at this time of the year entailed an extra amount of labour on the staff in maintaining general tidiness. It is hoped that the picnickers will adhere to the garden rules and throw refuse in the wire-netted bins provided for the purpose and thus co-operate with the garden officers towards keeping the garden in proper order.

In addition to the attention paid to the routine work of the garden improvements have been effected in the various sections. The most noteworthy and far-reaching step is the attempt towards replacing the old system of watering plants in the important areas of the garden. The system of watering plants by manual labour which has hitherto been followed is antiquated, expensive and cumbrous. The quantity

of the water given by means of man handling process is insufficient for maintaining the healthy growth of plants. Experiments made so far in watering the plants according to the new system yielded very promising results and it is obvious that when a motor and a pump are installed the arrangement of watering now adopted will be much more efficient. This watering system will prove to be extremely useful for rearing and acclimatising plants in the houses, flower gardens, shade rockery and nurseries and will thus be a great acquisition to the garden.

The garden was kept more clean and tidy than in the previous years by increasing the efficiency of the labour force and by stricter supervision of their work. Special attention has been paid this year to making the garden more interesting not only to the casual visitors to the garden out for recreation and enjoyment, but also for the students of botany and gardeners by enriching its collections in the various sections of the garden. About twenty species of interesting orchids have been imported from the Phillipines and Java and are doing well. The two rare desert plants—*Farocactus* sp. and the African *Mesembryanthemum* which have been introduced this year—are of considerable botanical interest. The beds in the Palm houses and the Orchid house have been rearranged and some were relaid with richer soil. This had the desired result on the growth of plants. Of the plants of medicinal value introduced this year are the *Cinchona* species—*Cinchona calisaya*, *Cinchona succirubra* and several species of *Eucalyptus*. The following species were planted in addition to those replaced during the year:—

Aphelandra nitens Hk.f., *Artocaria brasiliiana* A. Rich., *Bauhinia tomentosa* Linn., *Bougainvillaea glabra* Chois. var. *Cypheri* Hort., *Bougainvillaea glabra* Chois. var. *Sanderiana* Hort., *Bougainvillaea glabra* Chois. var. *Traillii*, *Bougainvillaea Louis Wathen*, *Bougainvillaea Maharaja* of Mysore, *Bougainvillaea Maud Chettleburgh*, *Bougainvillaea Mrs. Fraser*, *Bougainvillaea refulgens* Bull., *Bougainvillaea spectabilis* Willd., *Boussingaultia hasseloides* H.B.K., *Casuarina montana* Leschen. ex Miq., *Cinchona Calisaya* Wedd., *Cinchona succirubra* Par. ex Kolt., *Clerodendron ugandense* Prain., *Cupressus Lindleyi* Klot., *Erythrina indica* Linn. var. *alba*, *Erythrina indica* Linn. var. *Blacki*, *Erythrina lithosperma* Bl., *Erythrina Parcellii* Hort., *Erythrina suberosa* Roxb., *Eucalyptus citriodora* Hook., *Eucalyptus crebra* F. Muel., *Eucalyptus ficifolia* F. Muel., *Eucalyptus globulus* Labill., *Fatsia papyrifera* Bth. ex Hk.f., *Jasminum tortuosum* Willd., *Juniperus procera* Hochst. ex Lindl., *Melia Azedarach* Linn. var. *japonica*, *Passiflora stipulata* Aubl., *Pereskia aculeata* Mill. var. *Godsefiana*, *Pinus masoniana* D. Don., *Rhus semialta* Murr., *Solanum cornigerum* Andre., *Terminalia alta* D. Don. var. *tomentosa*, *Thunbergia mysorensis* T. Anders.

Of special interest this year is the flowering of "Century plants" *Corypha umbraculifera* (a palm tree) and the Agaves. The *Corypha* palm, commonly known as "talipot palm," flowers once in its life time after a period of 40 or 50 years when it attains full height of about 60-80 feet. The flowering stalk bursts out of the huge spathe with a loud explosion and gradually unfurls itself into a gigantic branched inflorescence 21 feet high which terminates the life of the palm. The leaves and the seeds of this palm are used for various economic purposes. The Agaves yield a useful fibre known as

“Sisal hemp.” These plants also flower once in their life time. A tall terminal inflorescence about 20 feet high comes out of the centre of the rosette of large fleshy leaves coated with wax. The plants reproduce both by suckers and by bulbils in the place of many of the flowers. There is a great accumulation of sap, about 1,000 litres being found in the young flower heads of some of the species of this genus. The Mexicans cut off the young heads, collect the juice and prepare a national drink out of it after fermentation. Some of the Agaves may last many years if the flowering scape is cut off as soon as four feet high, when the axillary branches continue the growth of the plant, which is thus kept long alive by being prevented from flowering. This method of prolonging life of the plant is of much commercial importance because of the larger yield of fibres from the leaves.

Some plants of the lower Himalayas have been introduced in the shade rockery which has been extended this year. The plants acclimatised in this section of the garden offer a splendid opportunity for studying many interesting hill plants which are not generally seen in the plains.

The great Banyan tree also received due attention and new shoots are spreading along the wooden platform forming a canopy over the roads as it was hoped it would be. The cleaning of the lakes was carried on in the usual manner and the rapid growth of submerged weeds has been kept under control by introducing a Brazilian water fern—*Salvinia auriculata*. This interesting floating fern by its rapid vegetative reproduction like that of the water hyacinth chokes up completely the surface of the water and thus shuts off light and oxygen from the submerged and rooted water plants in a lake or a pond. The aquatic plants below the surface of the water gradually die off in the absence of light for their assimilation and oxygen for their respiration. This exotic water fern, although it grows in dense masses, can easily and quickly be removed from the surface of the water after the desired result is obtained. The rooted aquatics and also the submerged water plants which create an insanitary state of the water can be kept under control by this biological means. It is doubtful, however, whether this rather delicate fern is strong enough to fight with water hyacinth and check its growth or replace the more powerful aquatic pest by a more speedy growth on the surface of the water.

It is gratifying that garden roads are now much improved by steady progress in road work. Some of the arterial roads and some paths too have been renovated and macadamised this year. Considerable progress has been made in writing labels for the plants, names of avenues and signboards. Scientific labels for plants are essential adjuncts to a botanic garden of this standard and particular attention has been paid to this part of the work. A little over 1,500 labels have been written during the year.

2. Plant and seed exchange.—Thirteen thousand five hundred and twenty-five plants, 243 packets and 19 pounds of seeds were distributed in India and different parts of the world. Four hundred and forty-four plants and 200 packets of seeds were received from India and abroad.

3. Herbarium and library.—The work of the herbarium proceeded on the usual lines. The total number of specimens identified was 2,843 for various institutions and correspondents in India and abroad. The majority, about 800 sheets, were received from the Imperial Forest Research Institute, Dehra Dun. A collection of about 702 sheets of Burmese plants was received from Mr. E. D. Merrill, Director and Administrator of Botanical Collections of Harvard University, Arnold Arboretum, Mass, Jamaica Plain, U. S. A., for naming and confirmation of those determined at Harvard University. The loaning of specimens has to be curtailed on account of the war. The total number of specimens sent on loan was 118. These herbarium specimens were sent to well-known workers whose opinion on the examination of the specimens sent prove valuable to other workers. Mr. A. D. Cotton, O.B.E., Curator of the Herbarium, Royal Botanic Garden, Kew, revised 29 sheets of *Lilium* (*Notholirion*). Dr. A. A. Pulle, Director, Botanical Museum and Herbarium, Utrecht, Netherlands, received 40 sheets of *Burseraceae* for examination in connection with his researches on the family. Dr. N. L. Bor, Forest Botanist, Forest Research Institute, Dehra Dun, studied critically 32 sheets of grasses. Mr. A. Das received a large number of Assam plants for his scrutiny in connection with the preparation of the Flora of Assam. The Forest Manager, Sikkim State, Gangtok, took an interest in *Prunus Padus* Linn. and *Acer caesium* Wall. Mr. A. D. Cotton returned 1,156 sheets after revising the names. One hundred and seventy-nine sheets sent to Dr. Pulle and Dr. Jonker in the Herbarium, Utrecht, Netherlands, in 1934, have all been received back safely. Dr. T. R. Holttum, Director, Botanic Garden, Singapore, Straits Settlements, returned 936 sheets of *Eugenia* after his critical study of the materials sent. A set of 867 specimens collected by Reverend Dickason in Burma on behalf of Dr. Merrill of Harvard University proved to be a valuable acquisition to the Herbarium. Fifty-one sheets of American Orchids, all duly named, have been received from Mr. L. O. Williams of Harvard University, Mass, U. S. A. Professor R. R. Stewart, Principal, Gordon College, Rawalpindi, was kind enough to present 108 sheets of N. W. Himalayan plants. Sir Arthur Hill sent us a duplicate specimen of the new species—*Androsace graminifolia* Fischer. A yellow-flowered specimen of *Holmskioldia sanguinea* Retz., belonging to the Shillong Herbarium, has been received from Professor S. R. Bose. One sheet of *Primula pudibunda* W. W. Smith was a new acquisition from the Chandra Nursery, Sikkim. The total number of specimens distributed from this herbarium was 629. A set of 298 duplicate sheets of Dr. Henry's collections from Central China made from 1885-88 was presented to Professor H. H. Hu as a valuable contribution towards building up the herbarium of the Fan Memorial Institute of Biology, Peiping, China. Professor R. R. Stewart received 128 sheets of the East Himalayan specimens. One hundred sheets were sent to the new Botanical Department of Dacca University for teaching purposes. Professor Dixon, the well-known plant physiologist of Trinity College, Dublin, greatly appreciated a gift of 52 sheets of East Himalayan plants. Six sheets of tea-plants (*Camellia thea*) were sent to Professor Mrs. L. Newton, University College of Wales, Aberstwyth, for the College Museum. Three duplicate sheets of *Notholirion macrophylla* filled up a gap in the Indian section of the Kew Herbarium. Two sheets—one of *Aryza sativa* and another of *Ficus elastica*—were given to the South African Museum, Cape Town. Dr. Handel

Mazzetti of Vienna, Austria, was presented with two duplicate sheets—one each of *Sibbaldia perpusiloides* and *Sibbaldia sikkimensis*. A gift of four sheets of *Thyrsostachys oliveri* were made to the Herbarium, Forest Research Institute, Dehra Dun. Two cotype sheets of the new species of *Eugenia* discovered by Dr. R. E. Holttum from the materials of this herbarium were presented to him for the herbarium of the Royal Botanic Garden, Singapore. Thirty herbarium specimens of selected timber trees of India with short notes on their distribution, quality of wood and uses were given to the Government Industrial Museum, Calcutta, for the purpose of exhibiting them in the gallery. The specimens of hard fungus collected by the Curator of the Herbarium in the Chittagong Hill Tracts were presented to Professor S. R. Bose of the Carmichael Medical College for his study of these fungi so much destructive to the timbers. Mr. E. H. Walker of Smithsonian Institute, Washington, sent 14 photographs of sheets of the different insufficiently represented species of *Myrsinaceae* and in return he received from us 8 photographs of Kurz's type sheets of species belonging to the same family. Two photographs of sheets of *Desmodium Karensium* were also sent to Dr. F. P. Metcalf of the Arnold Arboretum. Pen and ink sketches, one of *Ephedra Gerardiana* and one of *Nardostachys Jatamansi* were supplied to Mr. R. C. Richardson of British Mission at Lasha. A sketch of *Aconitum Balfouris* was sent to Dr. H. Chowdhury of the Punjab University. Informations on various botanical questions were supplied to many correspondents.

Notes on the cultivation of *Pyrethrum* in India were furnished to Mr. S. C. Sen of Mungpoo, and to Mr. K. M. P. Unithan of Badampahar, Tatanagar. Similar notes on the cultivation of the Ivory palm and Eucalyptus were supplied to other correspondents. A detailed account on the history and distribution of wild roses in India, was sent to Mr. E. M. Shipley, California. Rai Bahadur Dr. G. C. Chatterjee received information on the introduction of fodder crops in reclaimed areas. The Chief Chemist, Savan Sugar and Gur Refining Co., was instructed on the control of a parasitic flowering plant *Orobanche aegyptiaca* which proved to be a pest. Instruction was also given to the Superintending Engineer, Public Works Department, Bannu, about the eradication of some aquatic weeds choking up the canals. The suggestions given proved effective in tackling the complicated problem of irrigation there. A note on the systematic position of *Eulophia cullinii* was sent to the Director, Royal Botanic Garden, Kew, while Botanical information about *Indigofera Dosua* has been supplied to Koloniale Bank, Soerabaya, Netherlands, East Indies. Among others who were furnished with authentic information on various important botanical questions are Dr. R. Salgues, President of the Foundation Salgues de Brignoles (var.) France; the Locust Research Entomologist to the Imperial Council of Agricultural Research; the Millets Specialist and Geneticist, Lawley Road, Coimbatore; the Director, Malaria Institute of India, Kasauli; Reverend F. E. Peter, Gnadenberg b'l, Bunzlau, Germany; The Chief Commercial Manager, East Indian Railway, Calcutta; Dr. S. Hedayetullah, Economic Botanist to the Government of Bengal; The Chemical Adviser to the Department of Industries, Science College, Patna; Messrs. Mitsui Busan Kaisha, Fort Bombay; Dr. R. E. Holttum, Director, Botanic Gardens, Singapore; and the Imperial Mycologist, Imperial Agricultural Research Institute, New Delhi. Information about literature connected with research work and data and suggestions

related thereto have been given to a large number of botanists in India and elsewhere. The Excise Department and the Chemical Examiner to the Government of Bengal were furnished with necessary information relating to poisonous plants and drugs.

Mr. V. Narayanaswami, Systematic Assistant, Botanical Survey of India, discharged ably, under the supervision of the Superintendent, his duties relating to the above work as far as the Government of India is concerned.

Sheets incorporated in the herbarium during the year amounted to 4,626. These include the old collection of over 530 specimens of Helfer made a little over a century ago from places round about Calcutta, which were received from Dr. Ivan Klastersky, Narodi Museum, Botanicke Oddel, Praha, Prague. These were all named by the Superintendent and finally incorporated in the herbarium as a present from Dr. Klastersky who was duly furnished with the list of the plants identified here. This year 3,430 genus and species covers were changed and more than 2,000 specimens mounted. Repairing and cleaning of sheets continued throughout the year in the usual manner.

A botanical tour was undertaken by the Superintendent in the Darjeeling district. The specimens collected were put in the local herbarium which needs further enriching with unrecorded and more complete materials. Another botanical excursion was made by him to Jhargram in the Midnapore district. His collection includes a number of important medicinal plants. The ecology of the deciduous community of plants of this part of the province is also receiving his attention with a view to a further study of the vegetation in this area along the boundary of Bengal. Towards the end of the year Curator of the Herbarium botanised in the Kassalong forests of Chittagong Hill Tracts and collected about 1,000 specimens. Some of the species collected from this place are likely to prove new records. A joint excursion was made by the Superintendent, the Curator of the Herbarium, Dr. N. L. Bor of the Forest Research Institute, Dehra Dun, Dr. S. R. Bose, Professor of Botany, Carmichael Medical College, and Dr. J. C. Sen Gupta, Professor of Botany, Presidency College, Calcutta, to Port Canning in order to studying the littoral vegetation in the neighbourhood. It is a pity that this interesting relic of the mangrove flora found so close to Calcutta and offering a splendid opportunity for the study of botany by students of Bengal in particular and of India in general is fast disappearing like that of the Salt-lakes, Calcutta.

4. Publications.—During this year the Superintendent published three articles on "Science and Culture," viz.: (1) Vegetables—The sustainer of Life—Science and Culture, Volume V, No. 1, 1940; (2) Peculiar behaviour of a Banana Plant at the Royal Botanic Garden—Science and Culture, Volume V, No. 2, 1940; (3) Abstract of "The Western Isles through the mists of Ages by Sir A. C. Seward," Science and Culture, Volume 4, 1940. In collaboration with Mr. Narayanaswami, Dr. Biswas published a "Review on the Ferns of Mussoorie by P. N. Mehra" published in Current Science, Volume 9, No. 1, 1940.

The proofs have been corrected of "Plants of the Llyod Botanic Garden, Darjeeling, by Dr. K. Biswas" and "A Revision of the Labiate of the Indian Empire by Dr. S. K. Mukerjee." Both the papers have gone for final printing. "Flora of the Akha Hills," a

paper by Dr. K. Biswas, was handed to Dr. N. L. Bor for its publication in the Indian Forest Records. "Bharatia Banaushadi" by Dr. Biswas and E. Ghose, a treatise on medicinal plants in Bengali, is making steady progress in the Calcutta University Press.

The Annals of the Royal Botanic Garden, Calcutta, Volume XIV, Part 2, has been published. The set of plates printed by Messrs. Spottiswoode Ballantyne are lying with them in London. These plates could not be brought to India on account of the international situation. Steps for circulating this valuable publication in spite of the present difficulties has, however, been taken at the suggestion of Sir David Prain and Mr. I. H. Burkill, the authors. Two sets have therefore been distributed in London—one to "Nature" and one to the Linnean Society, London, and two in India—one to the Royal Asiatic Society of Bengal and one to the Royal Botanic Garden, Peradeniya, Ceylon.

A number of botanists and research workers from India and abroad worked in the herbarium from time to time. All of them were given every facility and assistance for their work. Dr. N. L. Bor and his assistant Mr. M. B. Raizada of Dehra Dun consulted the herbarium materials in connection with the identification of their specimens and the collecting of data for other botanical investigations. The work on poisonous plants and medicinal plants of Brevet-Colonel R. N. Chopra continued in the herbarium. Necessary co-operation was given to his botanists Messrs. R. L. Badhwar and N. C. Goswami and their assistants who worked satisfactorily throughout the year. Other visiting botanists were Messrs. R. N. De and A. Das, Dr. D. Chatterjee, Messrs. Sunil Mookerjee, P. N. Mehra, G. Mitra, Miss S. Meyer, Professor of Botany, Bethune College, Mr. A. K. Chakravarty, Assistant at the Rice Research Farm, Chinsura, Dr. A. H. Hallen, M.D., New Zealand, Professor C. A. Rylands, Professor of Sanskrit, London University.

Sir Mirza M. Ismail, Dewan of Mysore, the Hon'ble Khan Bahadur M. Azizul Haque, C.I.E., Speaker Legislative Assembly, and the Vice-Chancellor of Calcutta University, Mr. Kamal Yar Jung, Dewan of Hyderabad, were amongst the distinguished visitors to the garden during the year.

Library.—The usual routine work of the library was carried on. Books sent on loan were 81 in number and those received back during the year numbered 95. This year 283 copies of books have been bound; of these, 200 copies were bound by the Superintendent, Government Printing, Bengal. Journals and periodicals purchased throughout the year were 26, and 68 were received in exchange or as presentations. A hundred copies of miscellaneous publications, a gift from Sir David Prain, were sent by Sir Arthur Hill from Kew. Best thanks are due to Sir David and Sir Arthur for this gift. Fourteen books were purchased and nine were received as gifts. The preparation of the catalogue of the library was renewed along with the checking of the books. Dr. D. M. Bose, Director, Bose Research Institute, Calcutta, sent in exchange the new and the missing volumes of "The Transactions of the Bose Institute", and the set has now been completed.

5. **Finance.**—Rs. 49,550 was allotted for staff and permanent establishment, out of which Rs. 49,564 was spent. Under all other heads the expenditure amounted to Rs. 49,451 against the total allotment of Rs. 49,708. Receipt of the department during the year amounted to Rs. 1,450.

6. **Staff.**—The post of the Superintendent was held by Dr. K. Biswas throughout the year. Dr. S. K. Mukerjee held the post of the Curator of the Herbarium and Mr. N. Mitra, the Curator of the Royal Botanic Garden, Calcutta, throughout the year.

Mr. Quasem Ali held the post of the Assistant Curator, Royal Botanic Garden, Calcutta, during the year except for a short period of leave of 1 month and 23 days from the 30th October 1939 to the 22nd December 1939 when Mr. J. A. Hulbert, Overseer, officiated as Assistant Curator. Mr. Rabindra Nath Das Gupta, an outsider, acted as a temporary overseer from the 20th November to the 22nd December 1939.

Mr. A. T. Banerjee was Head Clerk throughout the year and discharged his duties efficiently. All the other staff worked satisfactorily.

CALCUTTA GARDENS.

The work in the Eden, Dalhousie Square and Curzon Gardens was mainly of a routine type. The display of winter annuals was quite satisfactory in spite of the prolonged rains and the advent of the cold weather rather later than usual. The Dahlias and Asters grown from the acclimatised seeds proved very good and most of the flowers were as large as those grown from imported seeds. The Victoria regia has acclimatised itself in the lakes of the Eden Gardens much better than in the Botanic Garden probably due to the better arrangement of water-supply in the former. The leaves of this giant water lily reached an enormous size and created considerable interest and admiration among the public. The plants flowered well and freely from August to October and became favourite objects for photographic purposes. A sufficient number of acclimatised seeds and seedlings of this plant are available for distribution.

Special attention was paid to increasing the standard of æsthetic and horticultural aspects, and also the improvement of sanitary conditions in the three gardens as far as limited funds would permit. Many flowering shrubs and trees were planted in suitable places and special attempts were made to maintain the hedges in proper shape and to refill the sections through which short cuts across the lawns are made. Necessary repairs were done to the Orchid house. The stock of rare and delicate Orchids, Ferns, Arums, Maranta, and others were enlarged by adopting scientific method of propagation. Species of Vanda, Dendrobium, Cattleya, Phalænopsis, Renanthera and other Orchids in the shade houses flowered freely and with perfection. Four species of Orchids from Kalimpong presented by Master Humprey Jones were added to the collection this year. The lawn in front of the Pagoda was dug up, relevelled and returfed with Dhub grass and a low red border was made all round by planting *Aerua sanguinioides*. The flower beds were also rearranged in this portion of the lawn. The clear cut beds

here and those on the west of the Canna gardens though smaller in number were laid out in geometrical symmetry and this alteration in the laying out of the new flower beds enhanced the beauty of the garden and was much admired by the general public. The roads adjacent to this area were improved by a surface coating of "hotfix" and stone chips. Protection of the Calcutta gardens during the football seasons from the vast crowds that pass through them has become a problem. Provision of spiked iron railings on the walls of some portions of the Eden Gardens has become imperative.

The sanitary conditions of the lakes of the Eden Gardens cannot be improved without re-excavation. Weeding and surface cleaning, however, were carried on as far as possible. This year too some fish were caught from the lakes of the Eden Gardens and transferred to the Dalhousie Square tank. It is desirable to increase the stock of fish in this tank by letting in some good fry. This will attract anglers in sufficient number to recoup the money invested.

Finance.—Out of the total budget allotment of Rs. 31,169 under all heads Rs. 31,161 was spent. The receipt from the Dalhousie Square Garden amounted to Rs. 20 only.

Staff.—Mr. Merlin Jones held the post of the Assistant Curator, Government Gardens, Calcutta, and Mr. G. Mohiuddin was Overseer throughout the year.

LLOYD BOTANIC GARDEN, DARJEELING.

The rainfall at this garden was 123 inches being slightly less than the average. This, however, did not affect the growth of the plants. But prolonged rains followed by severe hailstorms towards the later part of the year damaged the annuals which had to be replaced in beds more than once. In addition to the routine work of the garden improvements were effected in many directions. The Sir John Anderson rock garden was extended and rearranged in order to raise the standard of this scientific garden to the level maintained in the other gardens of the temperate region of the world. The progress is slow but steady and it is hoped that in the near future it will be a centre of rare high altitude herbaceous and shrubby alpine flora which can be seen here to their best advantage blooming in the different seasons of the year. The value of this portion of the garden from the standpoint of botanical investigation need not be emphasised. The species added this year to this section of the garden are:—

Abies Webbiana Lindl., *Aconitum palmatum* Don., *Agapetes saligna* Hook.f., *Allium Victorialis* Linn., *Armeria mauritanica* Wallr. Necessary alterations to the laying out of the beds and to the displaying of green house pot plants in the conservatory resulted in better colour effects and were highly appreciated by the general public. Of particular interest is the flowering of the following plants of delicate beauty and of considerable horticultural value:—

Adenophora Bulleyana Diels., *Androsace Hookeriana* Klatt., *Androsace lactiflora* Hort. (Syn. *A. coronopifolia* Andr.), *Androsace Poissonii* Kunth., *Anemone Falconeri* Thoms., *Arabis pterosperma* Edgew. Several species of local orchids grown on large trees flowered profusely and attracted due appreciation from the public. Professor White of Ithaca, New York, who happened to visit the garden expressed his admiration of the garden in these words: "This is the finest spot in the Eastern Himalayas and the best centre for the study of the temperate flora of India." Special efforts were made to maintain the general tidiness of the lawns along the hillside by regular combing and thus the growth of moss was restricted. Top dressings and necessary repairs kept the roads and pathways in order. The naming of the roads according to the new map of the garden enable the visitors to have quicker access to any desired spot of the garden. The map is now published and available for sale at annas 4 per copy.

A student's garden with beds containing economic and medicinal plants of the Himalayas arranged in classified order has been designed by the Superintendent. It is being laid out under the special care of the Curator. This section of the garden, when properly developed, will be an asset to the garden and will prove to be of great educational and medicinal value.

The replacing of old trees and shrubs and the introduction of new ones continued. Two hundred and sixty-three plants were planted and 56 species of plants of economic value were added to the new student's garden in their respective family beds. Some new seats under the trees and rose bower with slight modification in their construction afforded much comfort to the visiting public. Necessary repairs to the houses, nurseries and durwans' shelters were carried out as far as funds permitted. During the monsoon there was a slip at the bottom of the malis' shed and it was necessary to erect the new rivetment wall to protect the shed from further damage. There were several cracks in the floor of the shed as well as in the plant house which were repaired with ferro concrete. About 58 packets of seeds were received on exchange from a large number of institutions in different parts of the world. Of these seeds the following species germinated successfully:—

Royena lucida, Omalanthus populifolius, Iris Kashmiriana, Lilium Lowii, Lilium ochraceum, Lilium Wallichianum, Pinus rigida, Pinus echinata, Pinus strobus, Pinus sylvestris, Sambucus canadensis, Picea abies, Aquilegia erimeea, Sedum spathulifolium, Sedum coccineum, Linaria cymbelina, Lilium longiflorum, Ephedra gerardiana.

Two thousand, six hundred and forty-two packets of seeds, 207 plants, 8,952 seedlings and 30 bulbs were distributed in India and abroad. In addition to these various botanical institutions and botanical departments of colleges in India and outside received plant materials for their study. The demand for such materials is increasing year by year evidently due to the advancement of knowledge and interest in the flora of our country. Famous botanists, research workers, college and school students and others interested in the Himalayan vegetation, visiting this garden and the herbarium, were taken round by the Curator and furnished with necessary information on various botanical and horticultural matters.

The Curator undertook a tour in October in the Singalela range in the region of Tonglo, Sandakphu and Phalute for his yearly collection of seeds and plants with a view to acclimatising them in Darjeeling.

The herbarium and the library were kept in better condition than last year and some additions were also made. It is expected that with the opening of the botanical departments in various colleges and with the growing interest in the vegetation of the Himalayas this local herbarium like that of the Calcutta herbarium will be more and more utilised. The Curator will be pleased to give all facilities and place the collection at the disposal of any botanist wishing to compare specimens collected from this most fine and rich floristic region of the Himalayas, with those collected from the Assam Hills in the East, the Nepal ranges in the West and Tibet in the North. If botanists fail to get all their specimens named here on the spot, the staff at the Calcutta Herbarium will gladly add their help in this direction at headquarters.

"The Plants of the Lloyd Botanic Garden" with a map is in the final stages of printing. The writer appreciates the ungrudging help rendered by Mr. S. N. Basu, the Curator, and Babu Jogendra Nath Nasker, the Herbarium Assistant, in the preparation of the book.

The garden register records 67,888 visitors to the garden during the year. This figure surpasses all previous records.

Finance.—Out of an allotment of Rs. 16,111 under all heads, Rs. 16,085 was spent.

Staff.—Mr. S. N. Basu was Curator, Lloyd Botanic Garden, Darjeeling, throughout the year.

DEPARTMENT OF AGRICULTURE, BENGAL.

FINAL FORECAST OF THE JUTE CROP OF BENGAL, 1940.

[NOTE.—On an average of the five years ending 1938-39, the areas under jute in the province of Bengal and the Bengal States to which this forecast relates, represent some 80·2 and 1·2 per cent. respectively of the total area under jute in India.]

Season.—As noticed in the Preliminary Forecast, the season opened favourably for the most part. Subsequently however the weather conditions took an unfavourable turn in the shape of drought or scanty and insufficient rainfall, arresting the growth and development of the mid and highland crop over a considerable tract in North and East Bengal. The Olitorius tracts in the West Bengal districts on the other hand did generally well with intermittent sunshine and rainfall from the second half of July onward. Continued shortage of steeping water was general. It seriously hampered the harvesting and as such the quality of the fibre has generally been disappointing. Some rainfall since the last week of August and the recent rise of rivers have partially relieved the position as regards steeping water.

Condition of the crop.—The general condition of the crop has, on the whole, been satisfactory except for continued lack of steeping water.

Area of the crop.—The area under jute is estimated to be 3,670,650 acres (revised) as against 2,549,600 acres in 1939.

Outturn.—As in the previous year the percentage figures are calculated on the basis of divisional normals which remain as follows:—

	Bales per acre.	
Dacca and Chittagong Divisions 3·7
Rajshahi Division 3·5
Presidency and Burdwan Divisions 3·2

The total outturn of the crop is estimated at 10,975,750 bales as compared with 8,321,200 bales last year.

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BIHAR.**FINAL FORECAST OF THE JUTE CROP OF BIHAR, 1940.**

[NOTE.—On an average of the five years ending 1938-39, the area under jute, to which the Bihar forecast relates, represents about 10·9 per cent. of the total area under jute in India.]

Acreage.—The final district returns of the six jute-growing districts of the province show an area under jute of 282,200 acres as against the last year's area of 265,500 acres. The increase is marked in all the districts except Champaran.

Weather conditions.—In March the rainfall was sufficiently above the normal everywhere but subsequently in the months of April, May and June the fall was below the normal in all the six districts in which jute is grown. Particularly in the most important jute district of Purnea, the fall was very low, resulting in stunted growth of the crop and consequently a very low outturn. In July the rainfall was above the normal in all the jute-growing districts except Bhagalpur and the Santal Parganas. In August the rainfall was general throughout the province. The weather was on the whole favourable for the growth of the crop.

Outturn.—In the district of Purnea the outturn of the crop has been estimated at 60 per cent. of the normal. Champaran reports 95 per cent. Muzaffarpur, Darbhanga, Bhagalpur and the Santal Parganas report 70, 50, 66 and 55 per cent., respectively.

Accordingly I estimate that the outturn this year will be 61 per cent. of the normal as against 80 per cent. in the last year. Taking the normal outturn per acre to be $3\frac{1}{2}$ bales as in previous years the gross outturn on 282,200 acres estimated to be under jute in this province, comes to 571,000 bales, against 708,900 bales last year. Adding 11,600 bales, to this as probable imports from Nepal, the forecast figure for Bihar comes to 582,600 bales.

DEPARTMENT OF DEVELOPMENT, ORISSA.**FINAL FORECAST OF THE JUTE CROP OF ORISSA, 1940.**

[NOTE.—On an average of the five years ending 1938-39, the area under jute in Orissa to which this forecast relates, represents about 0·6 per cent. of the total area under jute in India.]

Acreage.—The crop is mainly grown in district Cuttack. In two other districts, namely, Balasore and Puri, it is cultivated to a less extent. There has been no change in area since the preparation of the preliminary forecast. The total area sown is now finally estimated at 28,400 acres as in the preliminary forecast. There has been an increase of nearly 6,000 acres in district Cuttack over the last year's acreage. This is reported to be due to high price of jute prevailing in the last year.

Season.—As mentioned in the preliminary forecast there was good rainfall in May which stimulated sowing. In June, July and August the rainfall was considerably above the normal in districts Cuttack and Balasore. In district Puri the fall was above the normal in June and July, but was below in August. The rivers Mahanadi, Kathjuri, Brahmani and Baitarani were in high flood in the months of June and July. Some damage was caused by the floods to the crop in district Balasore.

Outturn.—The excessive rainfall in June to August has affected the outturn in all the districts.

The total outturn for the province is estimated at 65·5 per cent. of the normal against 63 per cent. of the last year. On the basis of $3\frac{1}{2}$ bales as the standard outturn per acre the gross yield on 28,400 acres sown this year comes to 62,100 bales in round figure against 47,300 bales last year.

DEPARTMENT OF AGRICULTURE, ASSAM.**FINAL FORECAST OF THE JUTE CROP OF ASSAM, 1940.**

[NOTE.—On the average of the five years ending 1938-39, the area under jute in Assam represents some 6·9 per cent. of the total area under jute in India.]

1. **Season.**—The weather was on the whole favourable for the crop throughout the season although continuous rain and insects caused some damage in certain districts.

2. **Area.**—The area has been estimated by the Deputy Commissioners to be 362,700 acres as compared with last year's actual area of 323,300 acres, and this year's preliminary forecast of 347,700 acres. The areas reported in the preliminary forecast have been revised in six districts.

3. **Outturn.**—The outturn per acre has been estimated to be 74 per cent. of the normal against 58 (revised) of last year. Taking 3·5 bales of 400 lbs. each of the jute fibre as the normal yield per acre, the total produce of the province this year amounts to 942,000 bales against 660,700 bales (revised) of last year or an increase of about 43 per cent.

Dacca, the 23rd September 1940.

First Forecast of the Winter Rice Crop of Bengal, 1940-41.

Note.—On an average of the five years ending 1938-39, the area under winter rice in Bengal has represented some 20·6 per cent. of the total area under winter rice in India.)

Character of the season.—Preparatory tillage for and the sowings of broadcast paddy were delayed in places owing to drought in April. Fairly wide spread rainfall in May, however, facilitated the operations. Rainfall in June, although deficient, was favourable for preparation of lands for winter paddy seedlings and sowings in seed-beds. Rainfall in July was considerably below the average in most of the districts with the result that transplantation was retarded in places of West and North Bengal. Good showers in August,

however, facilitated the transplanting operation and improved the prospects generally. As a result of insufficient rainfall, a reduced area has been brought under cultivation this year. The present outlook may be regarded as only fair on the whole.

Acreage.—According to the figures returned by the District Officers, the total acreage under winter rice is 14,776,400 acres as compared with 15,912,600 and 16,095,900 (revised) acres in the corresponding and final forecasts of last year, respectively.

Outturn.—From the summary of the district returns appended it will be seen that two districts report a normal crop of 100 per cent., 14 districts a crop varying from 70 to 92 and the rest below 70 per cent. of the normal.

According to the above estimates, the Provincial outturn works out to 75 per cent. as against 84 and 88 per cent. of the normal estimated in the corresponding and final forecasts respectively of last year.

M. CARBERY,
Director of Agriculture, Bengal.

Provided further that where a motor vehicle has more than four wheels and the drive is transmitted to all wheels other than the steering wheels without the interposition of a differential driving gear or similar mechanism between the axles carrying the driving wheels, it shall be deemed to be a sufficient compliance with this sub-rule if the brakes applied by one means of operation act directly on two driving wheels on opposite sides of the vehicle and the brakes applied by the other means of operation act directly on all other driving wheels.

(h) For the purposes of this rule—

(i) in the case of a motor vehicle other than an invalid carriage, a road roller or a locomotive,

(a) except in the case of a motor vehicle the unladen weight of which does not exceed 2,240 pounds or which is a passenger vehicle constructed or adapted to carry not more than seven passengers exclusive of the driver, not more than one front wheel shall be included in half the number of wheels of the vehicle, and

(i) Every locomotive shall have an efficient braking system, the brakes of which act upon all the wheels of the locomotive other than the steering wheels, provided that this provision shall not apply to a locomotive registered in India before the first day of April 1940, if the locomotive is propelled by steam and the engine thereof is capable of being reversed.

(j) The braking system operated by one of the means of operation shall, according to whether the vehicle is laden or unladen, be capable of bringing it to rest when travelling at the speed specified in the table below within the distance therein specified when, at the time of the application of the brakes, the vehicle is travelling over a hard, dry, level road in good condition, with top gear and clutch engaged, or when, in the same conditions, the efficiency of the brakes as determined

by a brake-testing meter approved by the Provincial Government is not less than 30 per cent. when the vehicle is laden and not less than 40 per cent. when the vehicle is unladen:—

Provided that the word “laden” here means with not less than 50 per cent. of the legal load, not 50 per cent. of the gross weight.

Allotment of areas and issue of licences.

36. (i) To every licensing authority or two or more licensing authorities as the local supervising officer may decide there shall be attached a primary licensing assistant to carry out the preliminaries, such as, preparation of allotment statement of licences and similar other work and generally to act as the clerk-peshker of the licensing authority or licensing authorities.

(ii) The primary licensing assistant shall be subject to the administrative control of the supervising officer and during the preliminary work relating to the issue of licences shall work directly under his personal supervision and guidance.

37. As soon as may be after the publication of a notification under section 9 of the Act, the Director of Land Records shall, for the information of the public and the growers of jute in particular, cause a notice in Form No. 16 to be put up at all district and subdivision headquarters within the area in which the growing of jute is to be regulated and at all police-stations within such area and shall cause copies of the notice to be published in every union in that area and also in as many mauzas of the union as possible.

38. (1) As soon as may be after the publication of the notice under rule 37, every licensing authority shall cause to be prepared by the primary licensing assistant attached to that authority a detailed allotment statement in Form No. 17 showing the name of the grower of jute, the total area on which each grower of jute of any mauza grew

jute in the year specified in the notification, the area recorded under sub-section (2) of section 3 of the Act and the proportionate area on which each such grower shall be entitled to grow jute in the following year.

(2) In preparing the allotment statement the following conditions shall be observed:—

(a) If the proportion fixed by the Provincial Government for the year be more than the total area recorded in the preceding or any of the preceding years specified in the notification, the excess area allotted to each grower of jute shall bear the same proportion to the total area of jute lands recorded in his name or in the name of his predecessor in interest in the year so specified as the proportion fixed by the Provincial Government.

(b) If the proportion be less, the area allotted to each grower of jute shall likewise bear the same proportion to the total area recorded in his name or in the name of his predecessor in interest as the proportion fixed by the Provincial Government to the total area recorded in the year specified in the notification and shall, in no case, except as provided under sub-rule (3), exceed that proportion.

(3) Lands recorded under sub-section (2) of section 3 of the Act shall not be subjected to any reduction; but, where a grower of jute is in possession of jute lands some of which have been recorded under sub-section (2) and some under sub-section (1) or sub-section (3) of section 3 of the Act, the quota allotted shall be as follows:—

(a) If the area recorded under sub-section (2) be less than the quota to which he would have been ordinarily entitled, the whole of the area recorded under sub-section (2) plus such portion of other jute lands as may have to be added to make up his full quota.

(b) If the area recorded under sub-section (2) be more than the quota to which he would have been ordinarily entitled, the whole of the area recorded under sub-section (2) only and no more.

Example:

Suppose the Provincial Government declare that the area on which jute may be grown in 1941 shall be only 50 per cent. of that grown in 1940 and suppose a grower of jute had in 1940 twelve acres of jute lands all of which were recorded under sub-section (2), his quota will consist of all the 12 acres, even though in the case of ordinary lands he would have been entitled to 6 acres only. But suppose, only 4 acres out of 12 were recorded under sub-section (2) his quota will be 4 acres of his lands recorded under sub-section (2) plus 2 acres out of the remaining 8 acres. Similarly, suppose 6 acres out of 12 were recorded under sub-section (2) his quota will consist of the 6 acres of the lands recorded under sub-section (2) only and nothing of the remaining lands.

39. Every allotment statement shall be put up for the inspection of the growers of jute at a conspicuous place in or near the compound of the office of the licensing authority or at such place or places as that authority may select for conducting business for the particular parts of the local area concerned or if such office or place or places

have not been selected, at the office of the union board or Panchayat or at any other prominent place or places as may be selected by the supervising officer for that purpose and specified in the notice issued under rule 40.

40. (i) Simultaneously with or as soon as may be after the preparation of allotment statement, the licensing authority shall issue a notice to inform the growers of jute of the mauza or mauzas mentioned in the notice that allotment lists have been prepared and put up for their inspection at the place or places specified in the notice and that on the date or dates specified therein, a primary licensing assistant will be deputed to the mauza or mauzas and that at the place and time specified, the growers of jute concerned shall appear before the said primary licensing assistant personally or through an authorised agent and produce their jute *khatians* and other documents relevant thereto for his examination and issue of licences.

(ii) Such notice shall be issued in Form No. 18 and not less than three clear days' time shall be given to the growers of jute to comply with the above notice.

41. Allotment statement and notices in Form No. 18 shall ordinarily issue under the signature of the licensing authority, but where the licensing authority is a Committee and if the Committee so desire or if it appears to the supervising officer that such a course would involve unnecessary delay, the supervising officer may issue the allotment statement and the notices in Form No. 18 signing them for the Chairman and such allotment statement and notices shall be deemed to have been duly issued by the Chairman of the Committee.

42. (1) On the date and time fixed in the notice issued under rule 40, the primary licensing assistant shall punctually commence business, calling the growers of jute one by one in the alphabetical order* in which the allotment statement shall have been prepared and if after examining their *khatian* and documents, he is satisfied that the grower of jute is entitled to obtain a license, the primary licensing assistant shall inform the grower of jute of his quota and ask him to specify the plot or plots or portions thereof for which the said grower of jute may desire to obtain a licence and on the latter's doing so, shall subject to sub-rule (2), prepare a licence in Form No. 19 in duplicate and subject to rule 46 deliver one copy thereof to the grower of jute concerned or to his authorized agent as the case may be.

(2) The choice of plot or plots or portions thereof mentioned in sub-rule (1) shall be subject to the following conditions:—

(a) The total area of plots or shares thereof selected by the grower of jute shall in no case exceed his quota as shown in the allotment statement.

*NOTE:—In column (2) name groups will be arranged in alphabetical order, e.g., A-B, C-D, E-F, and if there be a very large number of growers of jute, say, 200, in one mauza whose names begin from A alone, one or more dates should be allotted to this group only.

Unless this is done, all the jute growers will turn up every day and transaction of business apart from causing harassment to the growers of jute will become difficult.

(b) Except as provided in rule 49 the choice of lands shall—

- (i) If the proportion fixed by the Provincial Government by notification under section 9 of the Act be less than the area recorded in the year specified in the notification, be limited to such lands only as may have been recorded in the *khatian* of the grower of jute or his predecessor in interest.
- (ii) If the proportion be greater, the choice of lands provided the grower of jute has in his possession extra lands, be limited to such lands only as may necessarily have to be selected from outside his jute *khatian* to make up the excess portion of the quota.
- (iii) If some of the lands of the grower of jute have been recorded under sub-section (2) and some under sub-section (1) or sub-section (3) of section 3 of the Act and the total area of lands recorded under sub-section (2) falls short of the full quota of the grower of jute be limited to such lands only as may have been allotted in addition to those recorded under sub-section (2) of section 3 of the Act to make up the balance of his quota.
- (iv) If for any reason the grower of jute fails or is unable to choose his lands in a reasonable time, the primary licensing assistant shall himself make suitable choice of lands covering the full quota of the grower of jute and issue a licence.

43. If the primary licensing assistant is not satisfied that the grower is entitled to obtain a licence or if there be any difference of opinion or dispute regarding the specific plots to be entered in the licence, the following procedure shall be followed:—

(i) If the dispute be about the quota shown in the allotment statement or about any clerical mistake connected therewith, the primary licensing assistant shall direct the grower of jute to refer the matter to the former's immediate official superior within three days of the date on which the dispute arose.

(ii) If the grower of jute desires to select plots not borne in his jute *khatian*, the primary licensing assistant shall inform the grower of jute of the procedure laid down in rule 49 and shall direct him to apply in Form No. 24 within seven days of the date fixed for the issue of licences in the mauzas to the former's immediate official superior.

44. The immediate official superior mentioned in rule 43 shall deal with disputes as follows:—

(i) If the dispute be of the nature of a clerical mistake in the allotment statement he shall, on receiving an application or information to that effect, first satisfy himself and after making necessary corrections, if any, inform the applicant accordingly and direct the primary licensing assistant to prepare a licence.

(ii) If it be an application under sub-section (2) of section 10 of the Act or if the dispute be of the nature that cannot be decided except by the licensing authority and if he be not himself the licensing authority, shall hear the applicant and after making such inquiry as may be necessary refer the matter to the proper licensing authority with a report thereon for final disposal.

If he be himself the licensing authority, he shall make or cause to be made such inquiry as may appear necessary and pass the final order thereon.

Demarcation.

45. If in consequence of rule 42 it becomes necessary that for the purpose of growing jute in the year for which the licence is being issued, certain recorded cadastral survey plots be subdivided, such subdivisions shall be demarcated and it shall be the duty of the grower of jute concerned to accompany the primary licensing assistant to the land in question on his verbal direction immediately after the licence has been issued or to assemble for the same purpose at such place and time as he may notify in Form No. 20 and to get the portion of their lands duly demarcated by him in such manner as may be found suitable and considered sufficient for the purpose.

46. (1) Demarcations of lands— which shall be clearly noted in both copies of the licence—shall be a condition precedent to the delivery of all licences involving such demarcation and unless modified by the licensing authority, shall be final.

(2) If after having been given a reasonable opportunity any grower of jute fails to get his lands demarcated, the primary licensing assistant shall inform the grower of jute of the consequences thereof and shall submit the licence in question to his immediate official superior with a report in Form No. 21 and such licences shall not be delivered until the grower of jute concerned shall have applied in Form No. 22 to that official superior or to the licensing authority when that authority sits for confirmation of licences and until his lands shall have been duly demarcated.

(3) If the grower of jute does not apply to the official superior and if the latter be not the licensing authority himself, he shall forward all such cases to the licensing authority for information and such action as it may deem fit to take :

Provided that in no case shall the conditions imposed by sub-rule (2) be contravened.

(2) In the event of any dispute or any complaint against the primary licensing assistant or if any alteration in the choice of lands is desired by the grower of jute subsequent to the issue of the draft licence, the licensing authority before coming to final decision, shall hear the grower of jute concerned and also the primary licensing assistant if he be involved in any way and, if necessary, may make such inquiry or consult such person or persons as it may deem fit and after recording a final order thereon may issue a modified licence:

Provided that no dispute questioning the correctness of the authenticated record shall be entertained by any licensing authority and that no licence either under sub-section (1) or (2) of section 10 of the Act shall be issued in contravention of the general restrictions laid down in rule 38 and that before a copy of the licence is delivered to the grower of jute the procedure of demarcating lands under rule 45, if necessary, shall be strictly observed.

If it is not so rejected, it shall ordinarily be heard and disposed of after the normal business of issuing licences under sub-section (7) of section 10 of the Act to the growers of jute of the local area has been completed and the licensing authority shall inform the applicant of the date and time fixed for the hearing of his application either verbally when he be present or in Form No. 25 appended to these rules if he be not :

Provided that if the application be granted in whole or in part and if a licence be issued for the lands all of which are new or some of which are new and some are those borne on the jute *khatians* of the licensee or his predecessor in interest, the applicant's copy of the licence shall not be delivered to him until all the new lands borne on the licence shall have been inspected and in the event of any demarcation becoming necessary, either of the new or of the old jute lands, until all such lands shall have been duly demarcated :

RESOLUTION—No. 1198L.S.G.

Calcutta, the 30th September 1940.

Read—

The reports of the Commissioners of Divisions on the working of union boards in Bengal during the year 1938-39.

During the year under review, the total number of union boards in the

Province increased from 5,041 to 5,072. Of the 31 new union boards, the district of the 24-Parganas was responsible for 26, and Nadia, Midnapore and Faridpur for 2, 2 and 1, respectively.

The total area covered by union boards was largest in the Rajshahi Division (15,346 square miles), followed by Dacca (14,208 square miles), Presidency (11,645 square miles), Burdwan (10,262 square miles) and Chittagong (6,601 square miles). The total population served by union boards was largest in the Dacca Division (12,635,000), followed by Rajshahi (9,225,000), Presidency (7,149,000), Chittagong (6,486,000) and Burdwan (6,228,000).

2. **Franchise.**—As in the previous year, an important feature was a marked rise in the number of voters of

union boards from 4,442,000 to 4,892,000 as a result partly of the widening of the franchise under the amended Village Self-Government Act and partly of the establishment of some new union boards to which reference has been already made. The total number of members of the union boards also increased from 45,262 to 45,576, of which 20,173 were Hindus, 25,070 were Muslims and 333 belonged to other communities.

It is interesting to note that 93 per cent. of the ratepayers of the district of Tippera were voters, Faridpur coming next with 89 per cent., followed by Rajshahi (85 per cent.), Midnapore (82 per cent.), Mymensingh (81 per cent.), Dinajpur (81 per cent.), and Bogra (81 per cent.). On the other hand, in the districts of the 24-Parganas and Jalpaiguri, only 53 and 54 per cent., respectively, of the ratepayers figured on the electoral rolls.

Elections passed off fairly smoothly and continued to evoke keen interest among the ratepayers and considerable rivalry among candidates. The enthusiasm evinced at the time of the elections followed by the anxiety displayed by qualified persons for appointment as members of union boards furnished an unmistakable evidence of the growing appreciation of the usefulness of these institutions and of the importance of the position of members and, especially of Presidents, as the accredited leaders of the rural people in all matters of local interest and welfare.

3. Finance.—The income of the union boards, including the opening balance, amounted to Rs. 101.37 lakhs against Rs. 103.29 lakhs in the preceding year. The receipts from the union rate suffered a decrease from Rs. 76.82 lakhs to Rs. 75.54 lakhs, i.e., by a sum of Rs. 1,28,000. The decrease in the collection of union rates was not evenly distributed among the union boards of all the districts in the Province. It was most marked in the districts of Murshidabad, Jessore, Pabna, Faridpur, Mymensingh, Rajshahi, Khulna, Burdwan and Hooghly, where the receipts from the union rate fell, as compared with those of the preceding year, by Rs. 1,32,000, Rs. 49,000, Rs. 37,000,

Rs. 36,000, Rs. 31,000, Rs. 18,000, Rs. 17,000, Rs. 14,000 and Rs. 11,000, respectively. On the other hand, collections of union rates were pushed up in the districts of Nadia, Midnapore, 24-Parganas, Dinajpur and Bakarganj by Rs. 1,03,000, Rs. 46,000, Rs. 29,000, Rs. 15,000 and Rs. 11,000, respectively. The fall in the receipts from the union rate could not therefore, be attributed to a general depression. It was the outcome of local calamities, such as failure of crops, floods, etc.

The total expenditure of the union boards decreased from Rs. 102.90 lakhs to Rs. 101.74 lakhs of which a sum of Rs. 50.43 lakhs, or about 49.56 per cent. of the total expenditure, was spent on the salaries and equipment of chaukidars and dafadars. The boards spent, during the year under review, a sum of Rs. 7.95 lakhs on the construction and maintenance of village roads, Rs. 9.61 lakhs on rural water-supply (of which Rs. 8.38 lakhs represented expenditure on original works), Rs. 2.71 lakhs on drainage, conservancy and other sanitary measures, Rs. 2.93 lakhs on primary education and Rs. 3.13 lakhs on medical relief.

The accounts of the union boards were audited, as usual, by the Circle Officers. The audit of the accounts of Bheail union board in the district of Dinajpur disclosed a defalcation of a sum of Rs. 346 and prosecution was started against the *ex-president* of the board. No other serious irregularity or defalcation was reported from any other district.

4. Activities of union boards.—(i) *Communications.*—The total amount spent by the union boards on the construction and maintenance of village roads rose from Rs. 7.57 lakhs to Rs. 7.95 lakhs of which about Rs. 2.78 lakhs represented expenditure on original works. The union boards of the Bakarganj district maintained their high standard of expenditure under this head and spent a sum of Rs. 90,000 (i.e., about 14.2 per cent. of their total expenditure) against Rs. 72,000 in the preceding year. Other districts with noticeably large expenditure by union boards on rural communications were Mymensingh and Dacca with an expenditure of

Rs. 56,000 each, Tippera (Rs. 43,000), Nadia (Rs. 41,000) and Burdwan (Rs. 41,000). In the district of Jalpaiguri, 35 miles of new roads and 16 bridges were constructed by union boards with the help of the Government of India's rural uplift grant and the Provincial discretionary grants. In certain districts, particularly in the Burdwan Division, there was a tendency on the part of some of the union boards to increase their expenditure on new works without making adequate provision for the maintenance of the existing roads. In view of their limited resources, the union boards would do well to avoid new commitments in the shape of original communications unless they are able to make adequate provision for keeping the existing roads in good repair.

(ii) *Water-supply*.—The total expenditure of the union boards on rural water-supply fell from Rs. 9.95 lakhs to Rs. 9.61 lakhs of which a sum of Rs. 8.38 lakhs represented the cost of original works. The union boards of the Burdwan district continued to do useful work for the improvement of water-supply in rural areas in co-operation with the district board and spent a sum of Rs. 57,706, the major portion of which (Rs. 42,741) represented expenditure on original works. The union boards of Hooghly spent a sum of Rs. 74,984, or about 20 per cent. of their total expenditure, under this head against Rs. 75,320 in the preceding year. Other districts with comparatively large expenditure by union boards on rural water-supply were Mymensingh (Rs. 1,63,000), Dacca (Rs. 86,000), Faridpur (Rs. 63,000) and Tippera (Rs. 60,000). The grants made by the Government of India and Provincial Government for the improvement of rural water-supply substantially augmented the resources of the union boards and encouraged their activities in this direction.

(iii) *Public Health*.—The total expenditure by the union boards on sanitation including drainage and conservancy showed a decrease from Rs. 3.08 lakhs to Rs. 2.71 lakhs during the year under review. The union boards of Birbhum spent Rs. 10,779 and Rs. 4,265 on conservancy and sanitation against Rs. 9,764 and Rs. 4,044,

respectively, in the preceding year. Throughout the year, the Presidents and members of union boards in this district evinced a keen desire to improve the conditions of the villages and wholeheartedly co-operated with, and sought the advice of Government officers in all measures of public health and other activities. Most of the union boards in the district of Hooghly engaged in works of rural reconstruction and encouraged the formation of rural reconstruction units within their respective jurisdictions. Rural Reconstruction Committees were also formed in almost every union in the district of Howrah and did commendable work in clearing jungles, filthy tanks and dobas. These Committees are reported to have set examples before the public as to how the local problems, particularly those concerning sanitation, could be solved by the local people themselves.

The union boards of Hajiganj and Laksham in the Tippera district maintained their high standard of sanitary and conservancy arrangements. In the Rajshahi Division, many union boards maintained conservancy arrangements, the most noticeable among them being those of Naogaon and Siliguri which virtually carried on the functions of municipalities in the matter of conservancy. The Siliguri union board continued the management of the conservancy arrangements of the Siliguri *hat* which had been entrusted to it in the preceding year. The Siliguri and Lalmonirhat union boards also maintained drainage systems. Union boards in the malaria-stricken areas of the Rajshahi district continued to undertake measures for the clearing of jungles, garbage-heaps and larvae-infested tanks as far as their funds permitted.

The union boards of several districts also spent comparatively large amounts on drainage works, the most notable of them being Khulna (Rs. 14,014), Bakarganj (Rs. 11,465), Faridpur (Rs. 10,786), Dacca (Rs. 10,255) and Nadia (Rs. 9,018).

(iv) *Medical relief*.—During the year under review the union boards paid due attention to the establishment and maintenance of village dispensaries and to the provision for medical relief in rural areas and spent a total sum of Rs. 3.13 lakhs under this head against Rs. 3.01 lakhs in the preceding year.

In the Burdwan district, two new union board dispensaries were opened during the year under review and a sum of Rs. 20,907 was spent against Rs. 18,231 in the year 1937-38. In Birbhum and Bankura, expenditure on medical relief increased from Rs. 11,334 to Rs. 14,996, and from Rs. 8,258 to Rs. 10,374 respectively. In Hooghly, the total expenditure on dispensaries was Rs. 45,908 against Rs. 33,334 in the preceding year. Three new dispensaries were opened and arrangements to open a few more were in progress. In Howrah, the union board dispensaries worked satisfactorily, although in certain cases these institutions suffered to a certain extent owing to financial difficulties, and the salary of the dispensary staff and the cost of medicines could not be paid in time. Fees were levied in certain cases for the medicines supplied to the patients from these dispensaries.

Reports from the Commissioners of Dacca, Presidency and Chittagong Divisions, do not furnish any details of the activities of union boards in this direction. The union boards of Bagha and Bilmaria in the Rajshahi district are reported to have established charitable dispensaries within their respective jurisdictions. A number of joint dispensaries was started by certain union boards of the Dinajpur district, while one such dispensary was opened at Joydharbhangra in the Jalpaiguri district by three neighbouring union boards with the help of Government grants.

(v) *Education*.—The total expenditure by union boards on primary education during the year fell from Rs. 3.21 lakhs to Rs. 2.93 lakhs, the decrease being shared, more or less, by the union boards of all the divisions.

Free primary schools were maintained by certain union boards in the district of Hooghly, while most of the union boards of the Howrah district made grants to the primary schools within their unions out of their own funds. Bagerhat, Raruli, Deara and Aichganti union boards in Khulna continued to provide free primary education with the help of a grant of Rs. 4,883 from the district board.

In the Rajshahi Division, the expenditure on primary education decreased in the districts of Rajshahi, Jalpaiguri,

Rangpur, Pabna and Malda, but increased in Dinajpur and Bogra. Bairehuna union board in Dinajpur, Ullapura and Mirkuntia union boards in Pabna, and Sadlichak Khempur, Bhimgole and Kansat union boards in Malda continued to maintain free primary schools.

A special feature of the year under review was the keen interest taken by the union boards, particularly in the Rajshahi Division, in the campaign for the primary education of adults. In Rajshahi, 100 night schools were started and the Rajshahi Sadar Union Boards Association distributed books of alphabet and writing materials free to adult students. Twenty-nine adult education centres in Jalpaiguri, 200 night schools for adults in Dinajpur and over 100 such schools in Malda were opened during the year under review. One hundred and seventy-seven adult education centres were maintained by the union boards of the Serajganj subdivision and the union boards of the Serajganj Circle alone contributed Rs. 2,124 for this purpose. The Haragram union board in Rajshahi constructed a building for an adult education centre. The union boards of Rajarampur, Karnai, Karakkabad, Karanji and Kashba in the Sadar subdivision of the Dinajpur district maintained reading rooms and libraries.

The union boards of Dinajpur spent the largest amount on primary education, viz., Rs. 25,386. Other districts worthy of mention in this connection are Howrah (Rs. 23,178), Birbhum (Rs. 19,320), Burdwan (Rs. 19,304), Jessore (Rs. 17,458), Khulna (Rs. 17,404), Dacca (Rs. 17,195) and Rangpur (Rs. 17,107). The union boards of Howrah spent on primary education 10 per cent. of their total expenditure during the year, while those of Khulna came next with an expenditure of 6.4 per cent., followed by the union boards of Birbhum and Pabna with an expenditure of 6 per cent. and 5.2 per cent., respectively.

(vi) *Some features of special interest*.—A satisfactory feature of the year's working was the extent to which some of the union boards were able to perform works of public utility with the help of voluntary labour. Many Rural Reconstruction Committees with intelligent leaders at their head made

their appearance and rendered valuable service in the cause of rural uplift and welfare. The "Water Hyacinth Week" inaugurated by Government also evoked considerable enthusiasm and public spirit on the part of union boards in many districts and provided a valuable training in self-help.

Many union boards in the Rajshahi Division maintained arrangements for street lighting. Three union boards in Dinajpur provided petromax lights at important road junctions. The Sukdebpur union board in the district of Dinajpur repaired an old embankment at Hossainpur, the cost of which was met from handsome local contributions.

5. Union benches and union courts.—*Union benches.*—The total number of union benches established and in existence was 1,515 against 1,521 in the preceding year. The number of offences reported to these benches was 98,674 showing an increase of 6,481 over the figure of the preceding year. The working of the union benches continued on the whole to be satisfactory; they afforded appreciable relief to the ordinary courts by disposing of a fair number of petty cases. These village tribunals are growing in popularity as they administer speedy justice locally at a very low cost and without any elaborate legal procedure.

Union courts.—The total number of union courts established in this province rose from 1,336 to 1,428 and the number of suits instituted in these courts was 72,699, showing a decrease of 14,023 as compared with the figure of the preceding year. Of the total number of applications for disposal during the year under report under the proviso to section 88 of the Bengal Village Self-Government Act, 63 cases were either dismissed or not prosecuted. In 148 cases the lower courts' orders were confirmed, in 18 cases they were modified, in 84 cases reversed and 55 cases remanded for retrial. The union courts are reported to have been generally popular, particularly among poor litigants, and to have afforded relief to the Munsifs in the majority of the districts. Some District Judges are of opinion that the utility of these courts would increase if a better personnel could be ensured and that further improvements and stricter supervision over the courts are required in order to free them from

the suspicion of corruption and malpractices as far as possible. It is reported from some districts that the introduction of the Debt Settlement Boards has affected the work of these courts to some extent.

6. Relations between the district boards and the union boards.—Apart from the question of financial assistance to the union boards, the general relation subsisting between the district boards and the union boards continued, as heretofore, to be quite satisfactory. With the gradual abolition of local boards, the district boards are coming to appreciate more and more fully the increasing importance of union boards as the primary units of rural administration.

It is regrettable to note, however, that many district boards were not generous enough in the matter of financial aid to the union boards under their charge. The total grant made by the district boards to the union boards under section 45 of the Village Self-Government Act decreased from Rs. 3.80 lakhs to Rs. 3.36 lakhs and represented 22 per cent. of the amount raised by union boards under section 37(b) of the Act and only 36 per cent. of the total augmentation grant received by the district boards from the Provincial revenues as compared with 23 per cent. and 40.6 per cent., respectively, in the preceding year. The district boards in all the divisions except the Presidency Division, curtailed their contributions to the union boards under section 45 of the Act, the most marked decrease being in the Burdwan and the Rajshahi Divisions where the grants paid by the district boards amounted to Rs. 66,261 and Rs. 69,425, respectively, against Rs. 94,158 and Rs. 90,154, respectively, in the preceding year. In the Presidency Division, however, the district board grant increased from Rs. 67,958 to Rs. 84,480.

The amount contributed by the district boards under section 33 of the Act for the management of works and institutions transferred by them to union boards decreased from Rs. 2.09 lakhs to Rs. 1.81 lakhs and the total income of the union boards from pounds, which represents a transfer of district board revenue to the union boards, also decreased from Rs. 2.32 lakhs to Rs. 2.14 lakhs during the year under review.

7. **General remarks.**—During the year under review the activities of union boards received some set-back owing to the distress arising from wide-spread floods in several districts which had an adverse effect on their finances. The administration of the boards was also by no means uniform in all districts and instances were not lacking in which they were hampered by inefficiency or intense party faction of a morbid type. The assessment and collection of the union rate under section 37(b) of the Bengal Village Self-Government Act still left much to be desired and, in many cases, the progress achieved by the union boards was far short of the requirements in the matter of the amelioration of the conditions of life in the rural areas.

Generally speaking, however, the year under review witnessed a slow but steady progress in the work of the union boards, mainly as a result of an awakening of civic consciousness of the people

and of a general desire to shoulder greater responsibility in the administration of local affairs; and much valuable work was accomplished. The co-operation between the Police and the Presidents of union boards led to fruitful results in the prevention and detection of crimes. Village defence parties were organised along lines designed to ensure the maximum co-operation between union boards and the local police and a livelier interest was taken in the works of rural reconstruction. Water-supply projects, eradication of water-hyacinth and clearance of jungles with voluntary labour were some of the special features of the achievements of the union boards during the year under review.

**DEPARTMENT OF AGRICULTURE,
BENGAL.**

Dacca, the 2nd October 1940.

**Preliminary Forecast of the Bhadoi Crops
of Bengal, 1940-41.**

(Note.—On an average of the five years ending 1938-39, the area under autumn rice in Bengal has represented some 7·7 per cent. of the total area under rice in India.)

Character of the season.—Rainfall in February and March was sufficient for preparatory tillage and sowings commenced in the earlier districts. Drought in April somewhat interfered with the progress of the high land sowings, specially in some North and West Bengal districts. Fairly widespread rainfall in May, however, facilitated late sowings and benefited the growth of the plants to some extent. The season has not been a satisfactory one due to insufficient rainfall or drought.

Acreage.—The total area sown with the different *bhadoi* crops this year is reported to be 6,042,000 acres as against 6,355,400 acres and 6,446,800 acres, respectively in the corresponding and final forecasts of last year.

Of this the area under autumn rice is estimated at 5,336,700 acres as against 5,659,600 and 5,741,500 acres, respectively, in the corresponding and final forecasts of last year. The decrease in area under autumn rice is mainly due to the increased cultivation of jute.

Outturn.—According to the District Officers' estimates, the outturn of the different *bhadoi* crops for the Presidency works out at 73 per cent. of the normal this year as against 76 and 75 per cent., respectively, in the corresponding and final forecasts of last year.

Autumn rice is estimated to yield an outturn of 72 per cent. of the normal for the province this year as against 75 per cent. both in the corresponding and final forecasts of last year.

Director of Agriculture, Bengal.

Draft Notification.

In exercise of the powers conferred by sections 21, 41, 65, 67, 68, 70, 91 and 134 of the Motor Vehicles Act, 1939 (IV of 1939), and in supersession of the Bengal Motor Vehicles Rules, 1935, the Governor is pleased to direct that the Bengal Motor Vehicles Rules, 1940, published under notification No. 573Pl., dated the 12th March 1940, at pages 703-853 of Part I of the *Calcutta Gazette*, dated the 14th March 1940, as subsequently amended by notification No. 1980Pl., dated 21st September 1940, shall apply to the district of Darjeeling subject to the modifications that—

(ii) in rule 53(b)(2) the words "except the region of Darjeeling district" shall be added after the words "For other areas",

(iii) in the 8th Schedule to the Bengal Motor Vehicles Rules, 1940, the words "The district of Darjeeling except the Siliguri subdivision" shall be inserted, and

(iv) the following special rules for the district of Darjeeling be included as Chapter VII *Rules applicable to the district of Darjeeling*:—

208. Unless provided with pneumatic tyres and except as provided in this part of the rules, no motor vehicle shall be driven on any road in the district of Darjeeling.

209. No. 2511F.—4th October 1940.—The following corrections, which have been authorised, are published for general information:—

**Bengal Financial Rules, 1st Edition
(Reprint), 1930.**

Page 21—Rule 37.—Substitute the following for this rule:—

"37. Earnest money deposits tendered by contractors or purchasers of forest produce must be paid by them direct into a treasury or sub-treasury and orders authorising the repayments should be addressed by the Divisional Forest Officer to the Treasury Officer concerned. Earnest money deposits, which the purchasers of forest produce are required to make with their bids in auction sales, may however be accepted in cash by the Divisional Forest Officer (or a gazetted officer duly authorised by him) at the time of auction. Such deposits shall be accounted for in the books of the Forest Department as Revenue Deposits under the detailed head "Earnest money deposits received in the Forest Department" subordinate to the minor head "Revenue Deposits" under the major head "Civil Deposits" and should be remitted at the earliest opportunity to the treasury in the accounts of which they will be treated as "Forest remittances".

Note.—Earnest money submitted with sealed tenders must be deposited in the treasury by the contractor himself and a copy of the treasury chalan submitted with the tender to the Divisional Forest Officer as evidence of the fact that earnest money has been paid.

In the case of the Public Works and Irrigation Departments such deposits are received by the Departmental Officers and dealt with in their accounts.

Note.—As an exception to the second subparagraph of this rule, Divisional Officers are authorised not to pass through the divisional accounts earnest money received from, and returned to, contractors on the same day the tenders are opened, provided that the contractors concerned are required to give a stamped receipt for the money in the register of tenders maintained in the divisional office, and that the register is to that extent treated as a subsidiary cash book and consequently as an accounts form.

Expenditure on construction (residential or otherwise) and repairs executed by civil officers is treated as contingent expenditure of the department incurring it, when it does not exceed Rs. 2,500 in amount. When the amount exceeds that sum, and the work (residential or otherwise) is still executed by Civil Officers, the expenditure is treated as "works" expenditure of the department vested with the administrative control of the expenditure. The monetary limit is inclusive of the cost of land.

"No expenditure on construction and repairs of residential buildings borne on the books of the Communications and Works Department shall be incurred by civil officers. So far as non-residential buildings borne on the books of the Department of Communications and Works (Communications and Buildings) are concerned, Civil Officers in occupation of them may at their option execute from their departmental grant all classes of petty works of construction and repairs costing not more than Rs. 2,500 in each case in respect of such buildings, excluding all works and repairs in connection with sanitary, water supply and electric installation and the provision of fire appliances, which should invariably be executed through the agency of the Department of Communications and Works (Communications and Buildings). Work undertaken departmentally by Civil Officers must be done to the satisfaction of the Executive Engineer concerned who should be given facilities to examine materials and inspect work in progress. Officers of the Communications and Works Department, however, should not be asked to prepare plans and estimates, but the Executive Engineer should be allowed to inspect the plans and estimates prepared by the agency employed by the Civil Officers. On completion of a work carried out departmentally, the Civil Officers concerned must send to the Executive Engineer the detailed completion plans after endorsing thereon the actual cost of the work."

|--|---|
| (1) Application under section 527 ... | Ten rupees. |
| (2) Appeal under section 141 against a valuation made under Chapter X for the purpose of assessing land or buildings, or both, to the consolidated rate. | The fee which would for the time being be levied in a Civil Court other than the High Court or the Court of Small Causes of Calcutta on a plaint in a suit of a value equivalent to the amount which would be payable as consolidated rate for one year on the difference between the valuation against which the appeal is preferred and the valuation which the appellant seeks to have substituted therefor. |

**Second Forecast of the Sugarcane Crop of
Bengal, 1940-41.**

(*Note.*—On an average of the five years ending 1938-39, the area under sugarcane in Bengal has represented some 7·8 per cent. of the total area under sugarcane in India.)

Character of the season.—As reported in the first forecast the planting of setts was generally done under favourable weather conditions. Subsequently the growth of the crop was retarded at places owing to insufficient rainfall or drought which set in for some time. Intermittent sunshine and rainfall since the second half of July have, however, improved the prospects and the present condition of the crop is fairly good.

Area planted.—The total area planted with the crop is estimated to be 333,400 acres this year as against 319,300 and 315,800 acres, respectively, reported in the corresponding and final forecasts of last year.

Outturn.—According to the estimates of the district officers, the average outturn of the crop for the province this year works out at 83 per cent. of the normal against 79 and 84 per cent., respectively, in the corresponding and final forecasts of last year.

Condition figure.—The condition figure for the sugarcane crop is estimated at 83 per cent. as against a ten years' average of 85·6 per cent. This means that the condition of this year's crop is equal to about 97 per cent. of the ten years' average. The current year's acreage exceeds that of the previous year by 5·57 per cent.

Bengal Act XV of 1940.

THE BENGAL PATNI TALUKS REGULATION (AMENDMENT) ACT, 1940.

[*Passed by the Bengal Legislature.*]

[Assent of the Governor was first published in the *Calcutta Gazette* of the 31st October 1940.]

An Act further to amend the Bengal Patni Taluks Regulation, 1819.

WHEREAS it is expedient further to amend the Bengal Patni Taluks Regulation, 1819, for the purposes and in the manner hereinafter appearing ;

It is hereby enacted as follows :—

Short title.

1. This Act may be called the Bengal Patni Taluk Regulation (Amendment) Act, 1940.

Amendment of section 5 of Bengal Regulation VIII of 1819.

2. In section 5 of the Bengal Patni Taluks Regulation, 1819 (hereinafter referred to as the said Regulation) after the last paragraph the following proviso shall be inserted, namely :—

“Provided that, notwithstanding anything contained in this Regulation, the provisions relating to security shall not, after the commencement of the Bengal Patni Taluks Regulation (Amendment) Act, 1940, apply to the transfer of a *patni taluk* or a share or a portion thereof.”

Amendment of section 6.

3. In section 6 of the said Regulation for the words commencing with “It is hereby provided” and ending with “his special sanction” the following shall be substituted :—

“It is hereby provided that the rules of section 5 relating to fee for alienation shall be held to apply to transfers of any fractional portion of or the entire interest in, a *patni taluk*.”

Insertion of new sections 6A and 6B.

4. After section 6 of the said Regulation the following sections shall be inserted, namely :—

“6A. (1) If a person who holds a share or a portion of a *patni taluk* desires to pay his share of accounts, the rent to the *zamindar* separately, he may submit to the Collector a written application to that effect containing such particulars as may be prescribed by rules made by the Provincial Government in this behalf.

The Collector shall then cause a copy of such application to be served or published in such manner as may be prescribed by rules made by the Provincial Government.

(2) In the event of no objection being received by the Collector from any co-sharer of the applicant or from the *zamindar* or any of his co-sharers within six weeks from the time of service or publication of the copy of application under sub-section (1) whichever is later, the Collector shall direct the *zamindar* or *zamindars* to open a separate account in the name of the applicant to which all payments made by him shall be credited separately to his share. The date on which the Collector directs the opening of a separate account shall be held to be that from which the separate liabilities of the share of the applicant commence.

(3) If any of the co-sharers of the applicant or the *zamindar* or any of his co-sharers object that the applicant has no right to the share claimed by him, or that his interest in the *patni taluk* is less or other than that claimed by him, or if the application be in respect of a specific portion of the land of a *taluk*, that the amount of rent stated by the applicant to have been heretofore paid on account

Act, 1940*

(Section 4.)

of such portion of land is not the amount which has been recognized by the other sharers as the rent thereof, the Collector shall refer the parties to the civil court and shall suspend proceedings until the question at issue is judicially determined.

- (4)(a) Whenever a separate account shall have been ordered to be opened in respect of a share or a portion of a *patni taluk* under sub-section (2), or
- (b) whenever a *patni taluk* shall have been divided or the rent payable in respect thereof shall have been distributed under section 6B,

if the *taluk* shall become liable for sale for arrears of rent, only that share or portion of such *taluk* shall be put up for sale in respect of which the arrear of rent may be due.

- (5) In the advertisement of sale, notice of intention to exclude the share or portion of the *patni taluk* from which no arrear of rent is due shall be given. The share or portion of the *taluk* sold, together with the share or portion excluded from the sale, shall continue to constitute one integral *taluk*, the share or portion sold being charged with the separate portion of the rent assigned thereto.
- (6) If in the case of a sale according to sub-section (5) the highest offer for the share or portion offered for sale is not equal to the amount of arrears of rent for which it was advertised for sale and the subsequent arrears of rent due thereon up to the date of sale, the sale shall be stopped and a notice that the entire *patni taluk* shall be put up for sale for such arrears shall be sent to all co-sharers of the tenant in such manner as may be prescribed by rules to be made by the Provincial Government.

On the twenty-first day from the service of notice on the co-sharers of the tenant, the entire *patni taluk* shall be put up for sale for the arrears, unless any other co-sharer of the tenant shall, within fifteen days, have purchased the share or portion in arrear by paying the whole of the arrears of rent for which it was advertised for sale and the subsequent arrears of rent due thereon or the tenant pays up the whole of such arrears within the said fifteen days :

Provided that, if a *zamindar* omits to avail himself of the means provided by this Regulation for realisation of any arrears of rent due in respect of a share or a portion of a *patni taluk*, he shall not be entitled to put up for sale under this Regulation the entire *patni taluk* for recovery of such arrears.

- (7) If such purchase is completed, the officer making the sale shall give a certificate of sale and delivery of possession, and if no such purchase is made within fifteen days, the entire *taluk* shall be sold in the manner referred to in section 14 of the Bengal Land-revenue Sales Act, 1859.

(b) At the end of clause *third* the following shall be added, namely :—

“The *zamindar* shall send by registered post to all defaulters a copy of, or an extract from, the notice containing a specification of any balance that may be due to him on account of the rent of the current year up to the end of the month of *Aswin*, and other particulars mentioned in this section.”

(c) After clause *third* the following clauses shall be added, namely :—

“*Fourth.* Where the *zamindar* is satisfied that there is reason to believe that the defaulter is keeping out of the way for the purpose of avoiding service of a notice or document under this section or that for any other reason the notice or document cannot be served in the ordinary way, he may cause it to be served by affixing the same in some conspicuous part of the house (if any) in which the defaulter is known to have last resided or carried on business or personally worked for gain.” (Cf. Act V of 1908, First Schedule, O. 5, r. 20.)

Service by the abovementioned method shall be as effectual as if it had been made on the defaulter personally.

Fifth. The name and address given in a notice of succession or transfer of a *patni taluk* or a share or a portion thereof under section 17A shall be presumed to be the correct name and address of the person succeeding to, or transferee of such *taluk* until fresh notice under that section has been given on a subsequent date or until a change of the address has been notified to the *zamindar* by registered post not later than 1st day of *Chaitra* or the 1st day of *Aswin* immediately preceding the date of sale fixed under this section.”

Amendment of
section 13.

7. After section 13 of the said Regulation the following clauses shall be added, namely :—

(a) the amount so paid by him shall be deemed to be a debt bearing interest at twelve *per centum per annum* and secured by a mortgage of the *taluk* or a share or a portion thereof to him;

*The Bengal Patni Taluks Regulation (Amendment)
Act, 1940.*

(Sections 8—10.)

(b) his mortgage shall take priority of every other charge on the *taluk* or a share or a portion thereof other than a charge for arrears of rent; and

(c) he shall be entitled to possession of the *taluk* or a share or a portion thereof as mortgagee of the *talukdar*, and to retain possession of it as such until the debt, with the interest due thereon, has been discharged.

Nothing in this clause shall affect any other remedy to which any such person would be entitled.

Sixth. When a *patni taluk* or a share or a portion thereof is advertised for sale under this Regulation, for arrears of rent owing to the default of a superior *talukdar*, and an inferior *talukdar* pays money to the Collector in order to prevent the sale, such inferior *talukdar* may, in addition to any other remedy provided for him by law, deduct the whole or any portion of the amount so paid from any rent payable by him to his immediate landlord; and that landlord, if he is not the defaulter, may, in like manner, deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached." (Of. Act
VIII of
1885,
s. 172.)

Amendment of
section 14.

8. In section 14 of the said Regulation—

(a) after the last paragraph of clause *first* the following proviso shall be added, namely:—

"Provided that, notwithstanding anything contained in this Regulation the right of the *zamindar* to make the sale shall not be stopped by any party, nor shall the sale be reversed solely, on the ground that a notice or other document mentioned in section 8 was not served personally on the defaulters or any of them."

(b) after clause *second* the following clause shall be added, namely:—

"*Third.* Any *talukdar* shall be entitled to stay the sale of his *patni taluk* or of a share or a portion thereof before the sale of such *taluk*, share or portion actually takes place by paying to the officer conducting the sale the amount of arrears of rent for which it was advertised for sale."

Amendment of
section 14A.

9. In section 14A of the said Regulation—

(a) in paragraph (b) of the *first* clause after the words "together with interest" the words "up to the date of deposit" shall be inserted; and

(b) after *seventh* clause the following clause shall be inserted, namely:—

17. — 10. At the end of clause *third* of section 17 of the said Regulation the following paragraph shall be inserted, namely:—

"The Provincial Government may prescribe by rules the amount of charges incurred by the *zamindar* in bringing a *taluk* to sale under this Regulation."
